mvgmedia

digital world.real people.

DIGITAL WORLD REAL PEOPLE

Created in 1997, MVG Media, is a bunch of real people, passionate about the digital world. We specialize in the design and development of websites and digital solutions for a variety of business sectors and clients.

What we offer

- > Online brand building
- > Web design services
- > Database Solutions
- > Content Management Systems
- > eCommerce
- > Search Engine Optimisation
- > Asset Management Solutions
- > Hosting Solutions
- > Email Marketing
- > e-Flyers
- > Graphic Design
- > Video Production

WHAT WAKES US UP?

Coffee, passion and clients

Clients normally, because they know we're there for them - always. We love our work and our clients.

We have often been described as an unusual agency. A rare breed which combines technical expertise and creative flair in equal measure.

If it looks good, but is difficult to use, it's no good. If it's easy to use and looks great - we've done our job.

MEET THE TEAM

If we weren't such a modest bunch, we'd tell you how nice and talented everyone is.

Instead, we let our work and our clients do the talking

Director	Nick Marsh
Client Services	Emma Walker Nicole Moon
Senior Programmers	Peter Stevens Faizal Sahebodin Ram Karri
Design	Tom Denbigh Gavin Lee
SEO	Felix Adewoye

WHAT DO WE DO AGAIN?

Above all we love a challenge!

- > Simple information based web sites to transactional ecommerce sites.
- > Intranet sites to complex digital user interfaces.
- > Booking engines to regular email campaigns.
- > Complex database interfaces to fun games.
- > We approach everything we do with the same attention to detail and passion.
- > Oh... and a friendly smile.

GET NOTICED ON-LINE

Make the web work for your business.

It's no longer enough to just have a presence on the web.

- > You need to get noticed.
- > You need fast loading.
- > You need visual impact.
- > You need easy navigation.
- > You need to be unique.
- > You need to get your message across.
- > You need to get return on investment.

FIND ME

Search Engine Optimisation

Getting your name high up in the search engine listings, such as Google, MSN or Yahoo is vital for business.

- > We start by looking at the design of your site.
- > We check your meta tags.
- > We check your competitors.
- > We check your site mapping.

Once everything is in place, we check and improve your listings.

We also help place you on other business link sites.

And then over time, we will constantly monitor your organic listings, to make sure you remain present and competitive.

If you want to drive further hits through pay per click and online advertising, we'll help design and manage the entire process.

TAKE CONTROL

Content Management System

Once your website's up and running, chances are you'll want to update it yourself from time to time.

Our flexible content management system enables you to take control.

- > Create and edit web pages
- > Create and edit navigation headings
- > Insert images and documents in web pages
- > Track customer enquiries
- > Check and export data captured via forms
- > Due to the flexibility of our CMS, we can also easily provide bespoke solutions

KEEP TRACK & STAY LEGAL

Reporting, data capture & DPA compliance

We offer many different reporting solutions to measure the success of your web solution.

From 'off-the-shelf' packages to bespoke solutions where required.

We also ensure that any sites we build reflect the highest accessibility standards, including W3C compliance.

More than that, we have the expertise to advise you on all your data protection and data capture needs and requirements.

The London International Financial Futures and Options Exchange

We don't normally go in for awards, as we're too busy helping our clients.

However, we had a momentary weakness at the back end of 2006 and won Interactive Media 'Best in Class' Award for www.luminar.co.uk.
